Fall 2026 International Distinguished Lecture Series

NERO: An advanced Cybersecurity Ecosystem

Distinguished Speaker: Dr. Christos Douligeris

Professor of Informatics

University of Piraeus, Piraeus, Greece

Date: September 24, 2026

Time: 12:00 pm – 1:00 pm

Venue: Online

Abstract: NERO is an advanced Cybersecurity Ecosystem consisting of five interrelated frameworks provisioned to offer a Cybersecurity Awareness program, as recommended by ENISA to be the best way to educate and develop a security-first culture amongst employees on how to mitigate the impact of cyber threats and incorporate activities, resources, and training to foster a cyber security culture. NERO primarily provides SMEs with a Cyber Immunity Toolkit Repository, Cyber Resilience Program, and Cyber Awareness Training via Gamification and provides its modules through a user-friendly Marketplace. The effectiveness and the performance of the concept is being validated in three use case demonstrations on different domains: Enhancing Patient Data Security in Healthcare through Cybersecurity Tools; Strengthening Supply Chain Resilience through Cybersecurity Awareness in the Transportation and Logistics Industry; and Boosting Financial Security through Enhanced Cybersecurity Awareness and Tools.

Speaker's Biography: Dr. Christos Douligeris, currently a professor at the department of Informatics, University of Piraeus, Greece, held positions with the Department of Electrical and Computer Engineering at the University of Miami. He was an associate member of the Hellenic Authority for Information and Communication Assurance and Privacy and the President and CEO Hellenic Electronic Governance for Social Security SA. Dr. Douligeris has published extensively in the networking scientific literature, and he has participated in many research and development projects. He is the co-editor of a book on ''Network Security'' published by IEEE Press/ John Wiley and he is on the editorial boards of several scientific journals as well as on the technical program committees of major international conferences. His recent involvement in EU funded research includes ImmigrationPolicy2.0 which addresses the issues of immigrants and their integration through ICT and CYSM, which addresses the various aspects (including cyberterrorism) of security in Port information systems, CyberSec4Europe, NERO and CyberSecPro. His main research interests lie in the areas of communications, networking security, cybersecurity, and the use of technology in all aspects of addressing web science, data analytics, and emergency response operations.

All Faculty, Staff, and Students are most welcome to attend this exciting talk!
